### Description

This course provides access to information about equitable approaches to scholarly publishing in international research groups and consortia, especially those comprising partners from countries in the 'Global South.' We will address questions around data ownership, ethical aspects in research planning and implementation that lead to multiple possible pathways to disseminate the knowledge gained in an equitable and beneficial manner for all contributing parties involved. The Global Code for Research in resource-poor settings serves as a guiding principle as much as FAIR and CARE principles for data management and longterm archiving. What are the affordable publishing workflows? Which Open Access repositories serve best the interest for equitable knowledge sharing to ensure maximum possibilities for knowledge transfer to the various stakeholders of society in a given research context while ensuring knowledge exchange also on a global level?

### **Course content**

- Approaches to scholarly publishing in international research groups
- Data ownership and ethical aspects in research planning
- Data management and archiving
- Affordable publishing workflows
- Open Access repositories

### **Learning Objectives**

- Balanced expectation management and contribution recognition
- Being able to budget and plan for the unexpected

### **Organizer**

The Berlin Center for Global Engagement (BCGE) at the Berlin University Alliance (BUA), consisting of Freie Universität Berlin, Humboldt-Universität zu Berlin, Technische Universität Berlin and the Charité – Universitätsmedizin Berlin. The BCGE is a platform for existing and new projects in the fields of (1) research on, from, and with the Global South, (2) science diplomacy, and (3) academic freedom.
